2.Theepob Laopornpitchayanuwat 6532100021

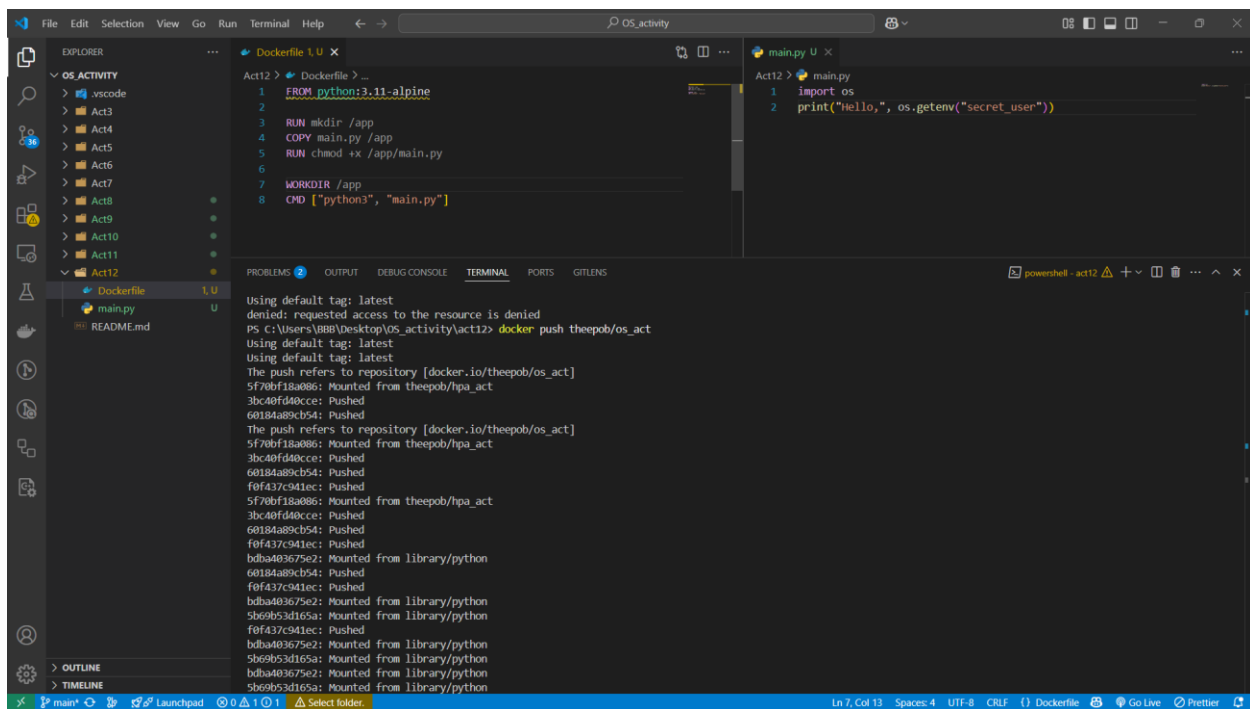

3. Poopha Suwananek 6532141821

Process

1.write Dockerfile and python code for hello secret user

2.run `docker build -t theepob/os_act .` to build image

3run `docker push theepob/os_act` to push to dockerhub

The screenshot shows a Visual Studio Code editor with three main panels. The Explorer on the left shows a project structure with folders 'OS_ACTIVITY' and 'Act12', and files 'Dockerfile', 'main.py', and 'README.md'. The Dockerfile panel shows the following content:

```
1 FROM python:3.11-alpine
2
3 RUN mkdir /app
4 COPY main.py /app
5 RUN chmod +x /app/main.py
6
7 WORKDIR /app
8 CMD ["python3", "main.py"]
```

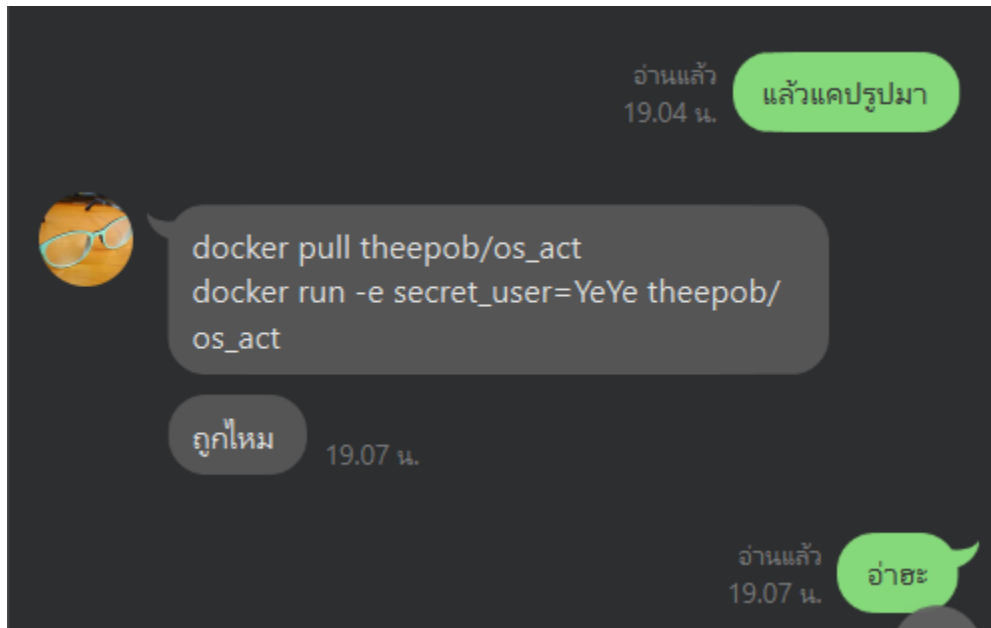

The main.py panel shows the following content:

```
1 import os
2 print("Hello,", os.getenv("secret_user"))
```

The Terminal panel shows the output of the `docker push` command:

```
Using default tag: latest
denied: requested access to the resource is denied
PS C:\Users\BBB\Desktop\OS_activity\act12> docker push theepob/os_act
Using default tag: latest
The push refers to repository [docker.io/theepob/os_act]
5f70bf18a086: Mounted from theepob/hpa_act
3bc40fd40cce: Pushed
